

Creation of the react app

- Create a menu with 3 tabs: News, Shows, Jobs.
Every menu (page) has to have a table from 3 columns: Time, Title, Domain.
By clicking at the menu item, please create corresponding request and display data as a table.
- Make requests using axios.
<https://axios-http.com/>
- API:
<https://api.hnpwa.com/v0/news/1.json>
<https://api.hnpwa.com/v0/show/1.json>
<https://api.hnpwa.com/v0/jobs/1.json>
- Sort by the pressed field when pressing the column name.
Date column has to be shown as a text (e.g. Mon Jun 19)
When clicking on a table element, open the comments page, with the comments of this element. (Request example <https://api.hnpwa.com/v0/item/32978018.json>)
You cannot use third-party libraries other than axios.
Style on your choice.

RESULTS

Please deploy the task results to GitHub pages and send your repository link and Github pages deployment to us.
